EXAMINER'S AMENDMENT

1> This action is in response to Applicant's remarks, filed 11.14.2005, and a phone conversations between Examiner and Applicants' counsel of 11.30.2005 and 12.2.2005.

2> An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Hamilton on 12.2.2005.

The application has been amended as follows:

Claim 1 : A processor-readable computer program product encoded on one or more programmable storage devices, the computer program product executable by one or more processors to perform method steps for configuring a transaction for a user operating a web browser wherein the transaction is used for automated testing of an Internet server system, the one or more processors being distinct from a processor providing the web browser to the user, the computer program product:

transaction configuration instructions configured to direct the one or more processors to generate and transfer Hypertext Markup Language (HTML) pages without cookies to the web browser and to configure the transaction for automated testing of the Internet server system in response to user inputs to the HTML pages, wherein the HTML pages include a

transaction selection page, a transaction record page, a transaction edit page, and a transaction play page;

page transition instructions configured to direct the processor to transition between the pages in response to the user inputs and to constrain the transition between the pages based on transition state rules;

a storage media configured to store the page transition instructions and the transaction configuration instructions; and

proxy instructions configured to direct the processor to ~~for capturing~~ HTML requests and responses that flow between the web browser and the Internet server system, to extract information from the captured HTML requests and responses for configuring the transaction, to edit the transaction, to store the configured transaction, and to play back the configured transaction in a periodic, automatic manner for testing the Internet server system and generating transaction test results;

wherein the transaction selection page allows a user to use the web browser to perform at least one of the actions selected from the group consisting of creating a new transaction, selecting an existing transaction, recording new transaction data, and initiating periodic, automatic testing with an existing transaction, the transaction record page allows the user to to use the web browser to initiate a recording of web browser activity to generate the transaction, the transaction edit page allows the user to use the web browser to edit the transaction generated using the transaction record page, and the transaction play page allows the user to use the web browser to view results of an automated test using the transaction generated using the transaction record page and edited using the transaction edit page.

The following is an examiner's statement of reasons for allowance: Pursuant to a phone conversation between Examiner and Applicants' counsel on 12.2.2005, the amendments in this action are introduced to bring the claim language of the claim 1 in line with the functionality and system illustrated in Figure 1. The reasons for allowance are best illustrated in Applicant's figure 1, whereby the invention of a computer program, is executed on processor separate from the computer that is running a web browser. Claim 1 now parallels the the functionality of Figure 1 whereby the processors (distinct from the processor running the web browser) now carry out the transaction recording and processing steps as disclosed in the claim. The prior art references fail to disclose or suggest the functionality of now amended claim 1 as they are directed towards systems whereby the functionality is located on the client computer running the web browser.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
